**Subject:** Heads up -- Preparing to post data (Region 6 sediment samples for August 11) in 30 mins

All -

This is a 30 minute notification that we are preparing to post the attached data to our website with the descriptive language below. Please go ahead to make any Congressional or other notifications. as appropriate.

Thanks

Laura

one-liner for main page:

The EPA sediment samples collected on August 11th at locations along the Animas and San Juan Rivers have been validated.

Longer descriptive:

The EPA sediment samples collected on August 11th at locations along the Animas and San Juan Rivers have been validated.

EPA has done a review of the data which included a comparison to screening levels for exposure during recreational use to determine if the metal concentrations are consistent with pre-incident levels.

The metal concentrations of the samples were below soil/sediment recreational screening levels. Based upon the sediment sampling results, sediment sample concentrations are trending toward pre-event conditions

**Subject:** Proposed web language -- Region 6 sediment samples for August 11

Terry, please let me know if the description below is accurate for the attached data set.

thanks

laura

one-liner for main data page:  
EPA sediment samples collected on August 11 from nine (?) locations

Longer description:  
The EPA sediment samples collected from nine locations on Monday August 10th along the Animas and San Juan Rivers have been validated.

EPA has done a review of the data which included a comparison to screening levels for exposure during recreational use to determine if the metal concentrations are consistent with pre-incident levels.

The metal concentrations of the samples were below soil/sediment recreational screening levels. Based upon the sediment sampling results, sediment sample concentrations are trending toward pre-event conditions.

**Cc:** EOC Environmental Unit; EOC\_Manager,  
**Subject:** Region 6 sediment samples for August 11

This data set has been reviewed by HQ EU and is approved to post once approved by PIOs.

This is supplemental sediment results for August 11 and should be associated with the Aug 10 12 and 13 data approved previously. There are 9 samples in this data set.
